

Introduction to JAVA

Program Internal

Why and How Java?

- History of Java
- Why Java?
- Where Java?
- Difference between JDK, JRE, JVM

Compiling our first Program

- Install the JDK if you don't have installed it.
- Set path of the jdk/bin directory.
- Create the java program (preferred notepad)
- Compile and run the java program (Assuming program is saved as Hello.java
 - For compiling: javac Hello.java
 - For executing: java Hello

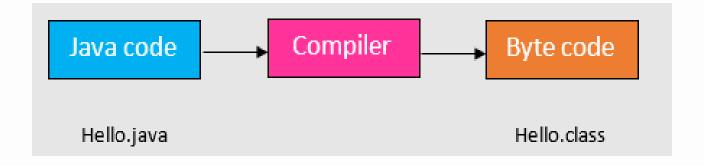

```
public class Main
       public static void main(String[] args)
4
           System.out.println("Welcome to FACE");
10
12
13
14
15
```

Output

Welcome to FACE

During Compile time

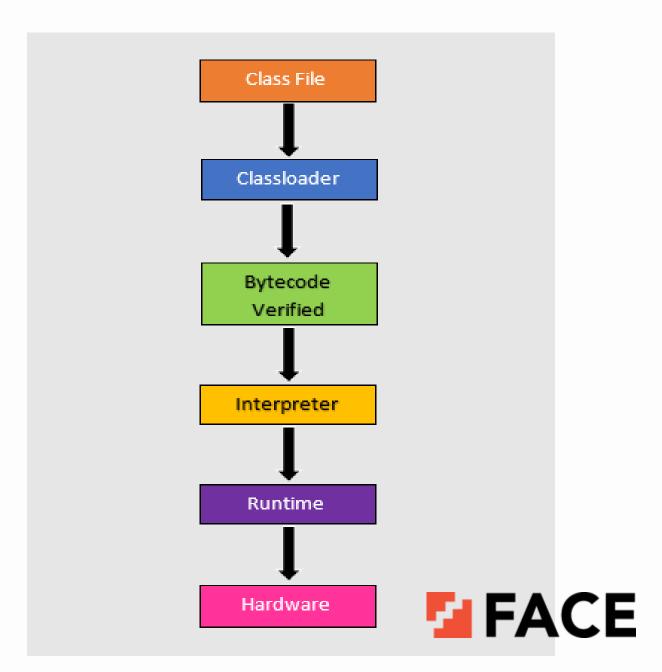

After writing our first program, we compile them.

Hello.class can be used in different operating system

During runtime

Types of Java Application

- Standalone Application
- Web Application
- Enterprise Application
- Mobile Application

Types of Java Editions

- Java SE Standard Edition
- Java EE Enterprise Edition
- Java ME Micro Edition
- JavaFX

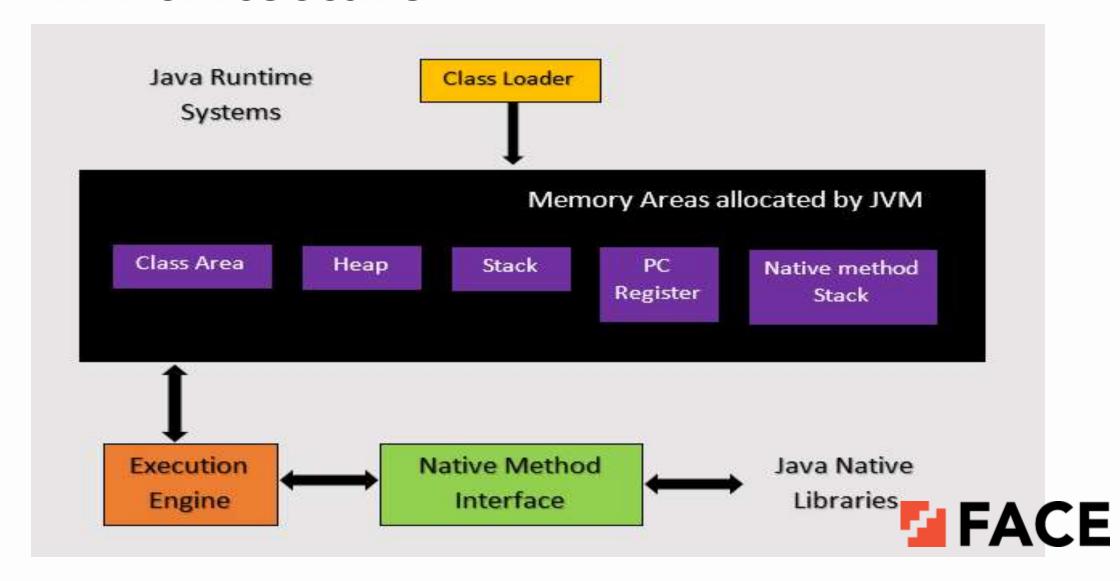

JVM Architecture

- JVM works with ...
 - Loads code
 - Verifies code
 - Executes code
 - Provides runtime Environment

- JVM gives the definitions ...
 - Memory area
 - Class file format
 - Register set
 - Garbage-collected heap
 - Fatal error reporting etc.

JVM Architecture

Path Setting

- Temporary Path
- Permanent Path
- Use of editors Sublime editor, code block
 - Notepad Execute a program

Why is JAVA Platform Independent?

Why is JAVA both interpreted and compiled language?

Why is JAVA both interpreted and compiled language?

Why is JAVA slow?

THANK YOU
